

INFORMATION ON MIDTERM EXAM #4

- **Coverage:** All topics covered this week (principles of experiments, one- and two-way ANOVA). **A significant portion of questions require using R to perform some analysis. Please have your RStudio ready before starting your exam.**
- **Time:** The exam will be administered through D2L. You may begin anytime between **12:00 PM Friday and 9:30 PM Sunday**. **Once you start, the D2L timer will begin counting your 120-minute exam period. You must submit before time expires, as the system will automatically close the exam after 120 minutes.**
- **Format:** The exam consists of about **30 multiple-choice questions**. Each student will receive a slightly different problem set with similar questions.
- **Length:** The exam has a strict 120-minute time limit. No extensions will be granted, as you are given a 2.5-day window to start the exam. **If you have requested accommodations through the Office of Educational Accessibility (OEA), your exam duration will be automatically adjusted based on the recommended time in your accommodation letter.**
- **Logistics:** To ensure you have the full 120 minutes to complete the exam, prepare a formula sheet in advance and have a scientific or graphing calculator ready.
- **Make-up Exam.** No make-up exams will be offered, as you have a **2.5-day window** to start the exam.
